

FISHDONKEY CHEAT SHEET - TIPS

Practice before you get out on the water

You already have the app downloaded, so join the tournament called: **PRACTICE ENTERING A FISH**. Get familiar with the app's camera and video.

Watch a 1 minute tutorial:
youtu.be/zuxh7FNukbA

Stringer of Fish

Each fish should be recorded one at a time, as they are caught. The app will auto-cull for each team. It will toss out smaller fish once stringer capacity is reached.

Digital Livewell

The fish icon is your Digital Livewell. It will show fish that are waiting to get on the leaderboard. When you return to good reception, simply tap your livewell and leave it open until all fish are RECEIVED.

Do NOT delete anything from your livewell or your camera photo deck. Do NOT alter any photos in your deck.

Required Documentation

1. Photo of you holding the fish
2. Photo of fish on bump board
3. Video release of the fish

If multiple people on your team would like to help record fish and/or view the leaderboard through the app, the person who registered your team can share their user/pass with other members. Once they share the user/pass, you will need to download the app and log in with those credentials.

It is wise to designate one person to record the fish for the entire team to maintain consistency.

To reflect a team name in the leaderboard, tap on your profile icon and change your first/last name to a team name. You can even insert a photo of your team if you'd like.

Sharing pictures: All photos taken through the app will place a copy in the camera photo deck. Share with your team!

No Internet?

Open the app before you head out. Tap on the name of your tournament. Leave the app open. It's ok to let it time out. Just don't log out. Enter fish as normal. Open your Digital Livewell when you return to push the fish through to the leaderboard.

Missing pics on the leaderboard?

See Digital Livewell tip.
